Machine Learning

## WORK EXPERIENCE

### Software Engineer

NewsCred Inc. [↗](#)

04/2018 - Present

NewsCred provides marketing management software as a SaaS to many multi-national companies across the world.

Achievements/Tasks

- Maintain a content ingestion system and fast-serving content repository.
- Rebuild a robust content-library to help our clients store marketing assets.
- Build a resource planner and reporter to help clients manage marketing resources.
- Pinpoint and resolve performance degradation issues in various features.
- Deprecate an existing Solr-based search system to introduce ElasticSearch.
- Reduce annual infrastructural expenses by optimizing data ingestion and storage.

### Software Engineer Intern

NewsCred Inc. [↗](#)

09/2017 - 04/2018

Achievements/Tasks

- Build an internal-tool to automate some of the customer support responsibilities.
- Address various custom client requests for customer-support's tech-wing.

## PERSONAL PROJECTS

### Authentic News (03/2020 - Present)

- Collects news articles from various web sources by html-parsing, and display in a federated platform.
- Provides ability to search and filter across publishers.
- Allows users to provide credibility-ratings to each news content.

### Academic Resource Management (03/2015 - 09/2015)

- Provides a Facebook-like platform for professors and students to exchange academic info and resources.
- Features include notice-posting, file-uploading, test-result publishing, private messaging etc.

### MeghPunji (04/2017 - 05/2017) [↗](#)

- Developed for a resort, for cottage booking system and advertisement purposes.

## EDUCATION

### BSc in Computer Science & Engineering

Bangladesh University of Engineering & Technology

02/2013 - 08/2017

Dhaka, Bangladesh

## ACHIEVEMENTS

### [Thesis] Topic based empirical search of online video tutorials (07/2017)

It takes some search keys from user and analyzes visual and audio data to decide what fragments of the primarily searched videos are relevant.
